

Micro Focus Software Security Center v21.1.1

Patch Release Notes

Document Release Date: July 16, 2021

Software Release Date: July 16, 2021

Products and/or Components Updated with this Patch

Fortify Software Security Center

New Features

This patch includes the following new features:

- Azure AD integration using the SCIM Protocol
- Ability to Assign Roles and Application Versions to Local Groups
- Ability to change the SSC URL path prefix for Kubernetes / Helm chart deployment

Fixes

The following problems are fixed by this patch:

- Resolved issue where an error occurred when refreshing the Audit page if a text search was set and a group filter was chosen.
- Resolved inability to add an Analysis tag to an issue when the issues are grouped by Introduced Date.
- Resolved an issue where some API calls fail with a 500 error if the request contains both a token and a cookie.
- Resolved .../projectVersions/{id}/issues REST API call issue that resulted in issue duplication and pagination problems.
- Resolved issue with editing Local Users roles.

Documentation

The following topics have been added to the Fortify Software Security Center User Guide to support this patch:

- Implementation of SCIM 2.0 Protocol
- Using SCIM 2.0 and SAML 2.0 to Configure a Connection to Azure AD for User Provisioning
- Enabling SCIM

- Viewing Externally Managed Users and Groups

Fortify Software Security Center Installation Notes

To install this patch:

1. Unzip the patch zip file to get to the ssc.war WAR file.
2. Stop the Tomcat Server.
3. Navigate to the /webapps directory.
4. Remove the 21.1.0 WAR file and replace it with the 21.1.1 WAR file.
5. Start the Tomcat Server.

Post-Installation

Installing this patch places Fortify Software Security Center into maintenance mode. After you log in you will need to review and confirm your configuration settings and then restart the Tomcat Server. For information about maintenance mode, see the Fortify Software Security Center User Guide.

Known Issues

- Fortify Software Security Center must be deployed to /ssc if you plan to integrate it with Fortify WebInspect Enterprise.
- The link to the Fortify Release Notes in the Fortify Software Security Center Setup wizard is incorrect. Use the following link to access the release notes: https://www.microfocus.com/documentation/fortify-software-security-center/2110/FortifySW_RN_21.1.0/FortifySW_RN_21.1.0.htm
