

Micro Focus Fortify Software v21.2.2

Fortify ScanCentral SAST Patch Release Notes

Document Release Date: December 22 2021

Software Release Date: December 17, 2021

Products and/or Components Updated with this Patch

Micro Focus Fortify ScanCentral SAST Controller

Fixes

The patch includes the following change:

- log4j has been updated to version 2.16

Note: To update the Micro Focus ScanCentral SAST client, you will also need to apply the Fortify Static Code Analyzer 21.2.2 patch.

Documentation

No changes have been made to other documentation. Refer to the documentation for the 21.2.0 release.

Upgrade Notes

To enable the auto-upgrade of clients to version 21.2.2 using a version 21.2.2 Controller:

1. Install the 21.2.2 Controller.

For step-by-step instructions, see “Installing the Controller” in the Micro Focus Fortify ScanCentral SAST Installation, Configuration, and Usage Guide.

2. Go to the `<Controller_dir>/tomcat/webapps/scancentral-ctrl/WEB-INF/classes` directory, open the `config.properties` file, and set the `client_auto_update` to `true`.

3. Start the Controller

Note: The auto-upgrade feature should only be used to upgrade standalone clients to 21.2.2. When used as a sensor, Fortify Static Code Analyzer (SCA) also

needs to be patched to properly address the CVE's. To update embedded clients and sensors under SCA and Apps, it is recommended to install the Fortify Static Code Analyzer 21.2.2 patch.

Support
